

Astronomy without a Telescope

200 €

Author	**Edward Walter Maunder**
Year	**1902**
Book language	**English**
Condition	**Good**

General Astronomy

DESCRIPTION

An early uncommon printing of Maunder's classic that serves as an in-depth guide for observing constellations with the naked eye. Maunder's study of sunspots and the solar magnetic cycle led to the years 1645 to 1715 being commonly known and named the Maunder Minimum. This edition includes detailed state maps and key diagrams.
