General Astronomy

DESCRIPTION

Berlin and Leipzig, Hermann Hillger Verlag, 1906. 160 pp., with 65 illustrations, some full-page, original cloth binding, individual illustrations from the natural sciences, edited by Hermann Hillger). - The scientist Fauth (1867-1939), dedicated his life to lunar research, published numerous works in this field. The greatest achievement of his work, however, was the giant map of the Moon, 3.5 meters in diameter and containing more than 100,000 data points, which he compiled until
