General Astronomy

DESCRIPTION

The Hague: Adrianum Vlacq, 1656. Quarto, engraved portrait of the author bound before the first leaf of text, title printed in red and black, illustrated with numerous woodcut text diagrams, several of which occupy a full page, with divisional title pages; bound in full 18th-century vellum over boards with plated edges, central gilt tool depicting a saint on the front board, lacking green silk ties; several stamps altered or removed, including a worn one on the general title; punch hole on the front board penetrating through signature E; upper spine panel torn away; 18.3 x 14.5 cm. Ex libris Professor, astronomer, historian and bibliophile Owen Gingerich.
